Perfios Software Solutions Pvt Ltd

Experience

Perfios Software Solutions Pvt Ltd

Technical Lead Engineer

Apr 2024 - Present

- Engineered the scaling of a few Perfios Account Aggregator framework microservices using Reactive programming, optimizing system throughput to handle close to one crore transactions per day while reducing latency
- Spearheaded the architectural modernization of core Account Aggregator microservices, transitioning legacy modules into resilient services
- Pioneered strategic AI initiatives, leading the end-to-end development of Proof of Concepts (PoCs) to evaluate business viability and technical feasibility

Perfios Software Solutions Pvt Ltd

Principal Software Development Engineer

Apr 2023 - March 2024

- Architected a robust API Orchestration Layer to standardize external service invocations, promoting code reusability and reducing the integration time for new products by a few weeks
- Owned the end-to-end SDLC of the Financial Information Provider (FIP) module, taking the product from whiteboard architectural design to a production-grade system handling millions of requests daily
- Developed key growth-focused initiatives within the Account Aggregator framework, directly contributing to the wider adoption and market penetration of the ecosystem

Perfios Software Solutions Pvt. Ltd.

Senior Software Engineer

Apr 2021 - Jun 2023

- Led the technical onboarding for marquee major Private and Public sector banks to the Account Aggregator platform, managing the complete lifecycle from sandbox testing to production rollout
- Developed a high-throughput data streaming service to feed the Admin Dashboard, reducing data latency and providing stakeholders with instant visibility into system metrics

Perfios Software Solutions Pvt. Ltd.

Software Developer

Bengaluru Area, India

Jul 2019 - Mar 2021

- Engineered the Perfios-AA Admin Dashboard, a critical internal tool for managing the AA module. Developed robust RESTful Web Services using Spring Boot while crafting a responsive, user-centric frontend with React JS and Material UI
- Streamlined the release lifecycle by establishing GitLab CI/CD pipelines and containerizing applications with Docker, ensuring consistent and rapid production deployments
