PROFESSIONAL SUMMARY

Senior Technical Lead Engineer with over 7+ years of engineering leadership architecting high-throughput distributed systems, reactive microservices, and enterprise financial platforms. Currently driving the **PFM (Personal Finance Management) B2B Rearchitecture** across SaaS and On-Premises deployments for Tier-1 banks, scaling India's Account Aggregator framework to handle **over 1 Crore (10M+) daily transactions**, and automating InfoSec VAPT & dependency scanning via Google ADK & Claude slash commands (Harbor, Tenable, GitLab Ultimate).

WORK EXPERIENCE

Perfios Software Solutions Pvt. Ltd.	Bangalore, India • Jul 2019 – Present
Senior Technical Lead Engineer	Apr 2026 – Present
- Leading the PFM (Personal Finance Management) B2B Rearchitecture across both multi-tenant SaaS and enterprise On-Premises banking deployments, decoupling legacy modules into modular, high-availability microservices. - Automated InfoSec VAPT & dependency scanning via Google ADK and custom Claude slash commands integrated with Harbor & Tenable APIs; led automated GitLab Ultimate VAPT remediation and security fixes.	
Technical Lead Engineer	Apr 2024 – Mar 2026
- Engineered the scaling of Perfios Account Aggregator (AA) framework microservices using Reactive programming (Spring Boot & WebFlux), optimizing system throughput to handle 1 Crore (10M+) transactions per day with reduced latency. - Spearheaded architectural modernization of core AA microservices on Kubernetes & AWS; led development of Generative AI PoCs evaluating LLM feasibility for financial automation.	
Principal Software Development Engineer	Apr 2023 – Mar 2024
Architected an enterprise API Orchestration Layer standardizing external banking service invocations, cutting institutional integration turnaround by several weeks; owned end-to-end SDLC of the Financial Information Provider (FIP) module.	
Senior Software Engineer & Software Developer	Jul 2019 – Jun 2023
Led technical onboarding for marquee Tier-1 Private and Public sector banks to the AA platform; built a real-time data streaming service with Apache Kafka and the Perfios-AA Admin Dashboard with Spring Boot & React JS.	

TECHNICAL SKILLS

Backend & Reactive:	Java, Spring Boot, Reactive Programming (WebFlux), RESTful APIs, Microservices, API Orchestration
Architecture & Cloud:	Multi-Tenant SaaS, On-Premises Banking Deployments, Amazon Web Services (AWS), Docker, Kubernetes, CI/CD
AI, Security & Tools:	Claude Code (Slash Commands), Google ADK (Agent Dev Kit), Harbor & Tenable APIs, GitLab Ultimate VAPT, InfoSec AI
Databases & UI:	MongoDB, MySQL, Oracle DB, Redis Caching, Query Plan Optimization, React JS, Material UI

HONORS & PUBLICATIONS

Winner — Perfios TechLeap: Published technical paper " <i>Embracing Reactive Programming</i> " on Medium	Mar 2025
1st Place Winner — Clash of Tech Titans Hackathon: Top honor across company-wide engineering hackathon	Mar 2023
Pat On the Back Award: Recognized by executive leadership for architectural ownership of the FIP module	Mar 2024

EDUCATION & CERTIFICATIONS

B.Tech in Information Science & Engineering — PES University, Bangalore (CGPA: 8.0 / 10.0)	2015 – 2019
Generative AI with Large Language Models — DeepLearning.AI / Coursera	Apr 2024
